

**IN THE SPECIFICATION**

Please amend the application, as follows:

At page 6, first full paragraph;

“Another deficiency with ~~known~~known food processing apparatus is that there is no tactile means for clearly indicating to a person that is visually impaired as to which function control switches are appropriate for use in general or intermittently ~~during~~”

At page 13, last paragraph of “BRIEF DESCRIPTION OF THE DRAWINGS”:

“Figs. 13A~~, and 13B~~ and 13C form a composite chart showing the different types of errors detectable when the brewer is operating in the self-diagnostics mode as well a showing the error codes that are displayed when an error is detected, possible causes of the different error conditions, the appropriated corrective action and the action needed to clear the message display of the error code after an error has been detected.”
